OCR LAUNDRY BENCHMARK

Synthetic scanned document page 1
Scheduling experiments compare queue completion times.
Each file contains raster images instead of searchable text.
The quick brown fox jumps over the lazy dog.
Invoice reference 4815 1623 4200 and batch 2026.
Workers render each page before optical character recognition.
Short jobs may finish sooner when estimates are accurate.
Measurements include waiting runtime and total latency.
This content is generated locally for repeatable testing.
